Marat Gumarov

Software Engineer — Backend & Agentic AI

ikey678@gmail.com · github.com/MaratGumarov · @MaratGumarov · Oviedo, Spain
Spain residence permit · self-employed (autónomo)

01 SUMMARY

Software engineer with **8+ years** building scalable backend systems in Java and Kotlin — now shipping **production agentic AI**: MCP servers and AI agents on Anthropic Claude and AWS Bedrock, running company-wide at Provectus. **Claude Certified Architect** (Anthropic) and **winner of the 2025 AWS Generative AI MCP hackathon** (Deloitte & Provectus). Works spec-driven with AI coding agents to deliver faster across the stack.

02 EXPERIENCE

Software Engineer

Mar 2022 — Present
Remote · Spain

Provectus

Core engineer on HOPS — Provectus' company-wide internal platform for workforce management, staffing, presales, and delivery economics.

- Built the HOPS Agent end to end — an in-product AI assistant (Vercel AI SDK, Claude on AWS Bedrock) that works through the HOPS MCP server and renders generative, data-backed dashboard widgets users can pin and share; hardened it for production with strict schema validation and a self-repair retry loop, an LLM-judged eval harness, and deferred tool loading that cut tool-definition tokens ~5× per request.
- Shipped to production an MCP (Model Context Protocol) server that gives AI agents secure, governed access to company-wide workforce data — OAuth 2.1 authorization, curated read and write tools with preview-and-confirm for risky writes, a gated read-only SQL escape-hatch, and per-tool usage analytics; owned the production rollout end to end.
- Automated Statement of Work generation with a custom AI agent on Anthropic Claude via AWS Bedrock — the agent loop pulls live client and staffing data from internal HOPS services and flags conflicts; cut token cost and latency by introducing Anthropic prompt caching. Then took the SOW MCP server to production and shipped it as a Claude plugin on the company's internal plugin marketplace — agent skills with evals for daily SOW work, acting under each user's own OAuth identity.
- Built the financial microservice behind the platform's delivery economics — monthly employee-cost computation integrating BambooHR compensation data (Kotlin, Spring Boot, gRPC, jOOQ, R2DBC).
- Reduced response delays across teams with a timezone- and availability-aware notification system — change logs, message queues, Slack alerts, and automated weekly workload reports.
- Secured the platform with fine-grained role-based access control (RBAC) and a full entity audit-history changelog, improving authorization, transparency, and data integrity.
- Built intelligent search over corporate documents (PDF, PNG, JPG) in a microservice architecture, combining OCR with Elasticsearch-backed retrieval.
- Modernized legacy services behind a GraphQL API, building tooling to generate GraphQL schemas and semi-automatically map queries to JPA criteria.

Kotlin · Python · TypeScript · Spring Boot · FastAPI · MCP · Anthropic Claude · Vercel AI SDK · AWS Bedrock · jOOQ · gRPC · GraphQL · R2DBC · PostgreSQL · Docker · Kubernetes · React

Java Developer / Data Engineer

2018 — 2022
Russia

Sberbank

- Streamed tens of terabytes daily from relational databases (mainly Oracle) into the Sberbank data lake, as a core developer on the bank's high-speed Hadoop ingestion tool.
- Owned all major modules of the project — initial load, incremental load, data application, and backup.
- Extended the open-source Apache Sqoop tool with missing functionality to fit project requirements.

Java · Hadoop · Apache Spark · Oracle GoldenGate · Apache Sqoop · Scala · Hive · Oozie · Spring

Java Developer

2017 — 2018
Russia

Sberbank-Technologies

- Developed an authentication service for internal corporate resources.

Java · Spring

IT Security Administrator · C# Developer

2012 — 2017
Russia

Various Companies

Information security administration and C# / .NET application development.

03 SKILLS

Agentic AI Engineering	Model Context Protocol (MCP) · AI Agents · Anthropic Claude API · AWS Bedrock · Claude Agent SDK · Vercel AI SDK · Prompt Caching · Generative UI · LLM Evals · OpenAI / Gemini API · OAuth for AI Agents
AI-Assisted Development	Claude Code · Spec-Driven Development · AI Pair Programming · Agent Skills, Plugins & Subagents · MCP Tooling
Programming Languages	Java · Kotlin · Python · TypeScript · Scala · C#
Backend & APIs	Spring Boot · FastAPI · Microservices · gRPC · GraphQL · REST · JPA · jOOQ · R2DBC
Frontend	React · React Native / Expo · Next.js · Vite · Tailwind CSS
Data & Cloud	PostgreSQL · Apache Spark · Hadoop · Elasticsearch · AWS · Cloudflare Workers
Tools & DevOps	Git · CI/CD · Docker · Kubernetes · Helm · Gradle · Test Containers · JUnit
Spoken Languages	Russian — Native · English — Intermediate · Spanish — Basic

04 SIDE PROJECTS

AnyTest — AI Interview Coach

Repository

Web app for technical-interview prep — an AI coach on Google Gemini generates and evaluates questions, with voice input via the Web Speech API and a swipeable card UI. Fully localized into six languages.

React 19 · TypeScript · Vite · Google Gemini API · Tailwind CSS

Finch — AI Financial Assistant

A cross-platform mobile finance assistant — a conversational AI agent built with the Vercel AI SDK (Google Gemini), with a React Native / Expo client and a serverless Cloudflare Workers backend.

React Native · Expo · Vercel AI SDK · Cloudflare Workers · TypeScript

Claude Code Telegram Bot

Repository

Extended an open-source Telegram bot for remote access to Claude Code — migrated it to the official Claude Agent SDK with real-time streaming UX, and added a JWT-secured web app for browsing git diffs from chat.

Python · FastAPI · Claude Agent SDK · Telegram Bot API · JWT

05 RECOGNITION

Claude Certified Architect — Foundations

2026

Anthropic

Verify on Credly

Anthropic's credential for architects designing and building production-grade applications with Claude — Claude Code, the Claude Agent SDK, the Claude API, and MCP.

AWS Generative AI — MCP Hackathon

Deloitte & Provectus

Winner

2025

Ranked among the ten prize-winning teams at the AWS Generative AI Innovation Center Partner Alliance hackathon — recognized for accelerating business outcomes with AWS Generative AI solutions.

06 OPEN SOURCE

Contributor — Kafka-UI

Project

Contributed features and improvements to Kafka-UI, an open-source web GUI for Apache Kafka management — including Prometheus metrics support and schema-registry fixes.

07 EDUCATION

BSc — Information Security of Automated Systems

2007 — 2012

Kazan Federal University

Apache Spark for Data Engineering

2020 · Moscow

NewProLab · 116 hours

Java Developer Course

2016 · Kazan

IT-Park · 160 hours
